PROFESSIONAL SUMMARY

Detail-oriented and analytical Full-Stack Web Developer with a strong foundation in server-side logic, database management, and responsive interface design, backed by a B.Eng. in Electrical and Electronics Engineering. Experienced in engineering data-driven backend architectures using PHP, optimizing front-end performance, and troubleshooting workflows in high-availability environments. Proven ability to formulate clear system architecture, manage version control via Git, and collaborate effectively in technical teams. Eager to contribute problem-solving and full-stack development skills to an entry-level software engineering or web development role.

TECHNICAL SKILLS

- **Languages & Backend:** PHP, JavaScript (ES6+), HTML5, CSS3, SQL.
- **CMS & No-Code Platforms:** WordPress, Webflow.
- **Tools & Infrastructure:** VS Code, Git/GitHub, Netlify, Chrome DevTools, SAP HANA Database Monitoring.
- **Core Developer Competencies:** Full-Stack Architecture, RESTful Routing, Responsive Layout Optimization, System Diagnostics & Debugging, Technical Documentation.

TECHNICAL PROJECTS

Educational & Admissions Web Platform | NIIT Diploma Project | (2026)

- Engineered a full-stack web application using PHP to handle server-side logic, session management, and secure multi-role routing (Admin, Student, Prospect).
- Designed and built the front-end admission form interface and coupled it with backend processing scripts to automate profile creation within a centralized database.
- Refactored legacy code to ensure full cross-device layout responsiveness and fixed core client-side JavaScript functionality.
- Formulated comprehensive system architecture flowcharts to effectively balance project timeline goals and prioritize core data-handling modules.

Gas Safety IoT Real-Time Web Dashboard | Final Year Project, Delta State University (2022)

- Built a real-time web dashboard for environmental hazard monitoring and dynamic stream visualization.
- Integrated Wi-Fi and GSM hardware modules to establish a reliable end-to-end telemetry pipeline from hardware sensors to the web interface.
- Implemented frontend processing logic to visualize sensor telemetry data streams while mitigating false-positive alert thresholds.

Portfolio Website | Personal Project

- Designed, engineered, and deployed a responsive personal portfolio showcasing technical web development projects.
- Implemented clean, semantic layouts and optimized asset delivery for fast cross-platform rendering across mobile and desktop viewports.

PROFESSIONAL EXPERIENCE

IT Infrastructure & Database Support Intern | Project E-Delta, Asaba, Delta State | (Jul 2021 – Dec 2021)

- Monitored enterprise system health and SAP HANA database performance to maintain continuous application availability.
- Analyzed application, server, and network performance indicators to troubleshoot, debug, and isolate systemic runtime errors.
- Maintained precise technical documentation and conducted root-cause analyses on performance deviations to optimize platform uptime.

EDUCATION

- **Diploma in Web Development** | NIIT, Benin City, Nigeria | 2026
- **B.Eng. in Electrical and Electronics Engineering** (Second Class Upper) | Delta State University, Abraka | 2023

CERTIFICATIONS

- **Web Development Diploma** – NIIT, 2026
- **Graduate Member**, Nigerian Society of Engineers (NSE) – 2026
- **Project Management Professional (PMP)** – Skills Edge Consulting, 2024
